(k) Paralysis, weakness impaired motion or deformity of the upper or lower extremities, from whatever causes; varicose state of the veins especially of the leg, bunions distortion or misformation of the hands, feet, fingers or toes; flat feet.

(l) Distortion of the spine, of the bones of the chest, or pelvis from injury or constitutional defects.

2. DENTAL STANDARDS

A candidate must have sufficient number of teeth in order to enable him to masticate efficiently and on no account will he be accepted if he requires artificial dentures for efficient mastication.

In order to assess whether a candidate has sufficient number of teeth to masticate efficiently the following guide will be taken into consideration:-

Teeth which are not considered necessary for efficient mastication are allotted one point each and those essential two points, each. For instance each incisor, canine and 1st and 2nd premolars will have a value of one point provided their corresponding lower teeth are present.

Each first and second molar and well developed 3rd molar will have the value of 2 points provided in good apposition to corresponding teeth in the lower jaw. In case of 3rd molar not well developed, it will have a value of value of on point only.

When all the 16 are present in the upper jaw and in good functioning apposition to corresponding teeth in the lower jaw, the total value will be 20 or 22 points according to whether the 3rd molars are well developed

The following teeth will be present on each side of the upper jaw in good functional apposition to corresponding teeth in the lower jaw :-

(a) Any two of the following:-
Central Incisor
Lateral Incisor.
Canine.

(b) Any one of the following :-

(c) 1st Premolar
2nd Premolar

Any two of the following:-

1st Molar
2nd molar
3rd Molar

Provided there are at least 14 dental points in the mouth.

PYORRHOEA:

Men with severe pyorrhea should be rejected. If pyorrhea is slight and the teeth are otherwise sound the man nay be accepted if in the opinion of the dental officer he and be cured by normal dental treatment excluding extraction.

3. HEIGHT, WEIGHT AND CHEST -- MEASUREMENTS

A table showing required physical equivalents is given below Range of expansion of chest in all cases is to be a minimum of 2 inches (Height and weight for men fully stripped).

Remarks :- (for both Cadets and Officers)

(a) Limits of Hypermetropia (under Homatropine)

(i) Better eye:

Hypermetropia	
Simple hypermetropic astigmation	0.75 dioptres

Compound hypermetropic astigmation: the error in the more hypermetropic meridian must not exceed 1.5 dioptres, of which not more than 0.75 dioptres may be due to astigmatism.

(ii) Worse eye :

Hypermetropia	2.5 dioptres
Simple hypermetropic astigmation	1.0 dioptres

Compound hypermetropic astigmation: the error in the more hypermetropic meridian must not exceed 2.5 dioptres, of which not more than 1.00 dioptres may be due to astigmatism.

(b) The fields of vision must be normal to confrontation test.

(c) Candidates must possess binocular vision.

(d) Hypermetropia must not exceed :-

Eso-and Exo phoria provided there are no Ssymptooms :-	6 prism dioptres
Hyperphoria	1 prism dioptres

10. NIGHT VISION STANDARD

The candidates for entry into the National Cadet Corps (as Officers or Cadets) for the Senior Division (Naval Wing), who fail to secure grade II (eleven) are to be rejected.

11. PROCEDURE OF TESTING AND GRADING OF EYESIGHT

(a) Eyesight is to be tested WITHOUT GLASSES UNLESS OTHER WISE STATED

(B) Distant Vision is to be determined by test types with non-serif letters and the following conditions will be observed in conducting the test :-

Two ordinary 25 watt internally frosted (perl) lamps are fixed vertically, one on each side, at a horizontal distance of 12 inches from the vertical plane normal to and bisecting the card. One lamp is placed higher than the other, one being opposite the junction of the upper and middle thirds, and the other opposite the junction of the middle and lower thirds of the card. Opaque non-reflecting screen, preferably cylindrical, having a matt white interior, are fitted, so as to prevent direct light from the lamps reaching the candidate’s eyes. The distance between the test types and the candidate’s eyes is to be 20 feet.

Daylight is to be excluded while the sight testing is in progress and the testing compartment is to be moderately illuminated by artificial light.

Glaring lights and –other bright objects should not be allowed to interfere with the candidate’s field of vision and extreme contrast between the illuminated test card and the background is to be avoided.

The lamps should be renewed at suitable intervals.

Test cards are not to be permanently exposed, as they become discoloured and may be memorized by prospective candidates.

(c) Near vision will be tested with Snellen types, each eye being tested separately.

The test card should be well illuminated with natural or artificial light, and held by the candidate at comfortable reading distance.

(d) (Colour perception) :

Colour perception is to be determined by Jshihara Cards and Martin Lantern.
